PREFACE.

THIS, the third volume of the Catalogue of the Collection of Books, Maps, &c., in the Natural History branch of the British Museum, brings the series of entries under the authors' names down to the end of the letter "O."

The lines on which it has been prepared have been fully set forth in the "Introduction" to the first volume.

The publication of the present volume has been greatly delayed by other library work, including the re-arrangement and re-pressmarking of the books in the General Library.

Thanks for assistance in its production are due, not only to the persons already mentioned in the Preface and Introduction to the first volume, but also, owing to changes in the staff, to Dr. A. B. Rendle, Mr. L. J. Spencer, and Mr. G. C. Crick, now acting respectively for Botany, Mineralogy, and Geology; and further, to Dr. Knud Andersen, who has for some time past given most valuable assistance in connection with the titles of works in the Scandinavian, Hungarian, and Slavonic languages.

L. FLETCHER,
Director.

Lambert (A. B.) A description of the genus *Pinus* . . . (Also descriptions of many other new species of the family of Coniferæ . . . to which is added an appendix containing an account of the Lambertian Herbarium by Mr. [David] Don.) 2 Vol. *illust. (col.)* fol. *London*, 1803–24.

Vol. i. *pp. ii, [iv,] 86 : 42 pls. (2 plain), 1 port.* 1803.
The plates are numbered i–xxxviii; but there are two editions of pl. xxi; a plain as well as a coloured copy of pl. xxxiv and a pl. xxxvii bis; also an unnumbered plate marked in pencil "38*."
,, ,, Appendix. *pp. 87–98 : pls. xxxix–xliii.* [1807.]
According to Bohn this appendix was issued in 1807, and the last two sheets bear the date "1806" in the watermark.
Plate v was drawn by G. D. Ehret; ix, xvi, xx & xxxviii by Franz A. Bauer; xxxvii bis, xxxix & xlii by James Sowerby; the rest were the work of Ferdinand L. Bauer, whose original drawings for them are preserved in the Botanical Department.
This copy is one of twenty-five in which the plates (except pl. xxxiii) were specially coloured by Franz A. Bauer.
,, ii. *pp. vi, 42 [4] + 27*–34* & 40* : pls. i–vi, ciii–cxi,* all plain. 1824.
No pl. vii was issued. The descriptions and Appendix were written by David Don.
The plates were drawn by J. Sowerby, J. Lindley and the two Bauers.
A few descriptions of miscellaneous Plants and a note "On the native country of the Potatoe" are included.

A second edition of these two volumes was issued in 1828, and to these a third volume was added in 1837, in which the descriptions were also by D. Don. The three volumes were afterwards re-issued with varying title-pages, one of which read "Lambert's Genus *Pinus*," *&c.*, and appear to have been more or less "made up." The following is one of the most complete versions:—

—— [Another edition.] 3 Vol. *illust. col.* fol. *London*, 1837 [–42].

Vol. i. *pp. xx, 88 : pls. i–xxxviii, xxxviii bis & 1 port.*
,, ii. *pp. 2–124,* Append. *pp. i–24, 25–28, 27*–34*,* Synop. *[4] pp. : pls. xxxix–lxxiv & 41 coll. pls.*
,, iii. *pls. lxxv–ciii, with 30 foll. of descriptive letterpress.*

This was H. G. Bohn's own reserved copy, and contains more plates (chiefly those of Trees, that first appeared in the roy. 8° edition of 1832) than are usually found in copies of the work, as well as extra details on some of them.
The numeration of the plates goes from 1 to 103, No. lii onwards being supplied in pencil; but there are no plates numbered vi, lii to lxvi, or lxix; while there are the following additional ones, viz. i^b, v*, xiv*, xxii*, xxxv*, xlii^a–b, xlv^a–d, xlvi^a–b, xlvii* & l^a–b.
The portrait in front of Vol. i is dated 1829.
The date in the watermark of the three title-pages is 1838; that of some of the pages of the text is 1825; while pls. xlvi^b & lxxi bear watermark date 1827; pls. i, xii, xiii, xx, lxxxi & xci, 1838; and, save for a few unwatermarked, the remainder, 1842.

—— [Another edition.] 2 Vol. *illust. col.* 8°. *London*, 1832.

Vol. i. *pp. viii, 76 : pls. i–xliii, 1* & xii*, 1 port.*
,, ii. *pp. 77–182 [ie] : pls. xlic–lxix, lii*, lv^a–b & lxvi*.*
Another edition, with the same text, but having 93 coloured plates in folio, was also issued (Bohn).

Fasc. I & II bear date 1784, fasc. III–VI, 1785; but the contents and real dates of publication, so far as ascertainable, were—

Fasc.	I.	*pp. i–vi, 1–20, pls. i–x & viib.*	1785.
,,	II.	,, *vii & viii, 21–40, pls. xi–xx.*	1786.
,,	III.	,, *ix & x, 41–62, pls. xxi–xxx & xxxb.*	,,
,,	IV.	,, *xi & xii, 63–102, pls. xxxi–xlviii.*	1788.
,,	V.	,, *xiii & xiv, 103–134, pls. xlix–lxiv & liib, liiib, lvib, lviib, & lixb.*	1788.
,,	VI.	,, *xv & xvi, 135–181, pls. lxv–lxxxiv.*	1791.

The last four plates are plain, the rest coloured.
Lamarck, in "Encyclopédie Méthodique," Tom. III, 1789, gives references to plates that appeared in fasc. VI, but was manifestly citing from an advance copy, or proofs.

With fasc. VI a "Conspectus fasciculi septimi" was issued, paged 183–184, and giving brief descriptions of plates lxxxv–xcvi: part vii, however, was not published, and the numbered plates that have been preserved do not correspond exactly with the text of the "Conspectus."
The author also issued a few copies of what he called "Monographies," consisting of a plate or two, and one sheet of descriptive text. Those of which any record exists are: "*Louichia*," "*Virgilia*" (2 plates, two editions), "*Michauxia*" (2 plates, two editions), published before August, 1788, "*Buchozia*," issued shortly after (see his Letter to Dryander of 18 Aug. 1788), while there were besides "*Hymenopappus*," plates only of "*Oxybaphus*" and "*Tricratus*," as well as a single proof copy of a memoir on "*Kakile*."
These "monographies" were to have been re-issued as part of the "Stirpes Novæ," and "*Louichia*" was published as plate lxv, while "*Michauxia*," "*Virgilia*," and "*Tricratus*" were lettered as cxvi–cxx.
Separate copies of the two plates of "*Virgilia*," the two plates of "*Michauxia*," with four pages of text, the plate of "*Buchozia*," and one of "*Hymenopappus*," are preserved in the Botanical Department.

Of unpublished plates, intended to form part of the work, there are appended to this copy No. lxxxv–cvii, cix–cxxiv, with a finished coloured copy of plate xcvi, and proofs before letters of plates xcviii, civ, cx, cxi, cxiii, cxiv, cxv, cxxiii, besides unlettered proofs of plates numbered in pencil from 125 to 167. These bear manuscript notes by L'Héritier, Solander and Dryander.

Most of the plates for this and L'Héritier's other works were drawn by P. J. Redouté, one or two were by J. G. Bruguière and some by James Sowerby.

"Von diesem schon so lange angekündigten, und auf dem Titelblatt mit den Jahrzahlen 1787. und 1788. versehenen Werke, werden izt, in der Mitte des Jahres 1792, nur allein die Kupfer ausgegeben, mit der Nachricht der Text solle bald nachfolgen." Usteri, "Annalen der Botanick," III, 1792, p. 217.
The unpublished manuscript text passed into the De Candolle library, but Dryander records as having been in Sir Joseph Banks' Library a "prima plagula Geranologiæ brevioris, in qua continentur differentiæ specificæ . . . 26 specierum Erodii, cum observationibus quibusdam." (Cat. Bibl. Banks. Vol. III, p. 301.)

—— [Re-issue.] fol. *Parisiis*, 1813.

This re-issue was brought out by a naturalist named Garnery. The title is bound with the preceding, and the plates incorporated in the collection of drawings in the Botanical Department.

Linnæus (C.) [*Systema Naturæ.*]
[C. Linnæi . . . Systema Naturæ, *&c.* (contd.)]
[C. Linnæi . . . Methodus juxta quam Physiologus . . . concinari potest historiam cujuscunque Naturalis Subjecti. *1 p.* fol. *Lugduni Batavorum*, 1736.]
Wanting.
Printed as an appendix to the "Systema Naturæ," and, under the title "Methodus demonstrandi Lapides, Vegetabilia aut Animalia," included at the end of each edition from the second to the ninth.

—— [Reprint in facsimile.] Ad Memoriam . . . C. Linnæi opus illud quo primum Systema Naturæ . . . Regia Academia Scientiarum Svecica biseculari natali auctoris denuo edidit. [*foll. 8 : 1 port.*] fol. *Holmiæ*, 1907.

—— [Another edition.] C. Linnæi . . . Systema Naturæ, *&c.*—C. Linnæi . . . Natur-Systema . . . in die Deutsche Sprache übersetzet, und mit einer Vorrede herausgegeben von J. J. Langen. *pp.* [*iv,*] *70.* LAT. & GERM. obl. 4°. *Halle*, 1740.
A reprint of the first edition, in which only the order of the matter is re-arranged, accompanied by a German translation in parallel columns. Lange's preface is dated 4 May, 1740.
Linnæus placed this third in his list of editions.

—— Editio secunda, *&c.* *pp. 80.* 8°. *Stockholmiæ*, 1740.
This was the official second edition, and the dedication is dated 20 May, 1740. The contained matter has undergone alteration. Two issues appeared in the year: the one bearing the monogram of the publisher, "G. R.," on the titlepage, the other a vignette representing a garden.
The second edition of the "Fundamenta Botanica" [*q.v.*] was issued, and is frequently bound with this edition of the "Systema," although having a distinct titlepage.
Swedish names are given in both the Mineralogical and Zoological portions of the work, but not in the Botanical.

—— Editio quarta ab auctore emendata & aucta. Accesserunt nomina Gallica [by J. Jussieu]. (Fundamenta Botanica.) *pp. 108* (*xxvi*). 8°. *Parisiis*, 1744.
This edition was seen through the press by A. Bäck, who was then at Paris.
French equivalent names are added throughout, the Swedish being omitted; otherwise this edition does not differ in any very important respect from the official second.
The "Fundamenta Botanica" appended is a reprint, and has no distinct titlepage.

—— [Another edition.] *See* supra, C. Linnæi . . . Opera varia, *&c.* *pp.* [*ii,*] *376 : 1 pl.* 8°. *Lucæ*, 1758.
A reprint from the fourth edition, omitting the French equivalent names.

[—— Curante M. G. Agnethler . . . Editio altera, *&c.* *pp. 88.* 8°. *Halæ Magd.*, 1747.]
Wanting.
This is said to be identical with the second edition, except for the addition of the names in German. It was counted by Linnæus as the fifth edition.

—— Editio sexta, *&c.* *pp.* [*ii,*] *224* [*27*] *: 8 pls.* 8°. *Stockholmiæ*, 1748.
Stoever's statement that a portrait of Linnæus accompanied this edition is, according to Hulth, erroneous.
The names of the Animals and Minerals are given in Swedish as well as in Latin.
Cf. Montin's transcript of Linnæus' lectures, infra [*Miscellaneous*].

—— [Seventh edition.] Secundum sextam . . . editionem. *pp.* [*iv,*] *224* [*30*] *: 8 pls.* 8°. *Lipsiæ*, 1748.
Wanting the portrait of Linnæus.
A reprint of the preceding, but with the German, instead of the Swedish names.

—— [Eighth edition.] Herr . . . C. Linnæi Indelning i Ört-Riket, efter Systema Naturæ på Swenska öfwersatt af J. J. Haartman. *pp.* [*iv,*] *136* [*16*] *: 3 pls.* 8°. *Stockholm*, 1753.
This was counted by Linnæus as the eighth edition, although unaccompanied by the other portions of the work. He also counted with it the following edition of the "Regnum Lapideum."

[—— C. Linnæi . . . Observationes in Regnum Lapideum. *pp. 16.* 8°. (*H. Möller*) *Scaræ*, 1753 ?]
Wanting.

—— [Ninth edition.] Accedunt vocabula Gallica. Editio . . . auctior & emendatior. *pp.* [*viii,*] *227* [*26*] *: 8 pls.* 8°. *Lugduni Batavorum*, 1756.
Based on the "Secundum sextam . . . editionem," with some additions from the works of Gronovius, Réaumur, and De Geer, whilst the German names are replaced by French.

,, II. Regnum Vegetabile. (Genera Plantarum nova addenda.) *pp.* [*ii,*] *825–1380.*
[As far as the end of *p. 1352*, this volume is a reprint of the corresponding one in the preceding edition; after that page the setting is changed.]

[—— (Eleventh edition) 2 Vol. 8⁰. *Lipsiæ*, 1762.]
Wanting. Linnæus reckoned this as the eleventh edition, and stated that it contains no additions. According to Stoever it is also a pirated edition, and abounds in errors.

[C. Linnæi . . . Systema Naturæ, *&c.* (contd.)]

—— [Re-issue.] Tom. I & III [in 8]. 8⁰. *Lugduni*, 1789–96.
Wanting Tom. II (2 pt.), which was also issued as a separate work under the title of "C. a Linné . . . Systema Vegetabilium," *&c.* [*q.v.*]

Among works professing to be further editions of the "Systema Naturæ," but which have nothing in common therewith, save that the Linnean classification is adopted in them, are:—M. Houttuyn's "Natuurlyke Historie . . . volgens het Samenstel van den Heer Linnæus," *&c.*, 1761–85 [*q.v.*]; P. L. S. Müller's "Des Ritters C. von Linné . . . vollständiges Natursystem nach der zwölften Lateinischen Ausgabe," *&c.*, 1773–76 [*q.v.*]; and P. Höstlin's badly printed *précis* of Müller, entitled "Des Ritters C. von Linné Lehr-Buch," *&c.*, 1781–82 [*q.v.*]

Subsequent editions of the botanical portion were issued under the title of "Systema Vegetabilium," *See* infra [*Botanical Works*].

Linnæus (C.) [*Systema Naturæ.*]
A general System of Nature . . . Translated from Gmelin's last edition of the . . . Systema Naturæ . . . amended and enlarged . . . by W. Turton. 4 Vol. *illust.* 8⁰. *London*, 1802.
Vol. I is stated in the colophon to have been printed at Swansea in 1800, and Vol. III in 1801.

—— [Another edition] With a Life of Linné, *&c.* 7 Vol. *illust.* 8⁰. *London*, 1806.
Vol. I–IV are a re-issue of the preceding with new titlepages.
Vol. V is stated in the colophon to have been printed at Swansea in 1803; but whether it, also, was first issued before 1806 does not appear.
Vol. VI and VII are of the first and only issue.

Only 150 copies of this work were printed.

Lister (M.) J. Goedartius de Insectis, in methodum redactus ; cum notularum additione. Opera M. Lister . . . Item Appendicis ad Historiam Animalium ejusdem M. Lister, altera editio hic quoque exhibetur, *&c. See* GOEDART (J.) 8°. 1685.

Lister (M.) M. Lister, Historiæ sive Synopsis methodicæ Conchyliorum . . . liber primus (—liber IV.—Appendix ad . . . librum IV.—[Tabularum Anatomicarum explicatio.]) . . . S. et A. Lister figuras pin. 6 Pt. [in 2 Vol.] fol. *Londini*, 1685–92 [–97].
The four books and the Appendix contain impressions of copper plates, each including from one to several figures, and numbered up to 1057. In some copies there are two additional plates, 1058 and 1059. There is no plate numbered 53, 89, 164, 923 or 961, whilst there are three marked 101, and two each of those numbered 168, 512, 822, 846, 883, 931, 965 [misengraved 956] and 990. [For further minor errors, *See* EBERT'S "General Bibliographical Dictionary."]
The last part contains 22 plates, of which three are duplicates out of lib. III. It has no title-page, but eight pages of letterpress explanations. Plate II is dated 1693 ; and most of the plates illustrated the author's "Exercitatio anatomica," I–III, 1694–96, while Plate XVII illustrated his letter to the Royal Society on "The Anatomy of the Scallop," printed in June 1697, the text of the letter being reprinted in the explanation. This last part must therefore have been published about, and not before, that time.
Sets of proof impressions before lettering were circulated in 1685, under the title "De Cochleis," *&c.* Some of these, including Sir Hans Sloane's copy, are in the Printed Book Department, British Museum, and others are in the Library of the Royal Society.

—— Editio altera. Recensuit et indicibus auxit G. Huddesford. 6 Pt. [in 1 Vol.] fol. *Oxonii*, 1770.
The same subdivisions occur in this, as in the previous edition.
The two additional plates, 1058 and 1059, are present, whilst those that were duplicated in the supplement to the last edition, have here been omitted from lib. III. There is also some slight rearrangement of the plates throughout. The text (*pp. iv, 6, 7* [*ii*], *12, 77*), which has all been bound together in the front of the volume, includes :—A preface by the Author, some notes and observations written by Lister on a set of proof plates of the first edition, the "Tabularum Anatomicarum explicatio," and two Indexes.
A manuscript list giving the Linnean names of the figures in the order of their occurrence, has been prefixed to this copy.

—— Editio Tertia. Recensuit et indice locupletissimo instruxit L. W. Dillwyn. fol. *Oxonii*, 1823.
Wanting the plates.
The text, *pp.* [*iv,*] *xiii, 48*, consists of a reprint, from the second edition, of Lister's "Notes and Observations" with the "Tabularum Anatomicarum explicatio," and Dillwyn's "An Index to the Historia Conchyliorum of Lister," *&c.*, which last was also issued as a separate work.

The first volume comprises L'Obel's "Stirpium Observationes" with "De Succedaneis, imitatione Rondeletii." The second, or "Adversariorum Volumen," is the so-called second edition of the "Stirpium Adversaria nova" of Pena and L'Obel [*q.v.*]. It is in reality a re-issue of Plantin's remainder of that work with a new title-page and re-set preface, and the addition of pp. 457 to the end. Another copy of the last leaf, in which the colophon is differently set, has been inserted at the end.

There are some manuscript notes by Dr. R. Pulteney in the first volume.

Wanting *pp. 251–2* of the "Adversariorum volumen," which is entitled "Dilucidæ Simplicium medicamenorum [*sic*] explicationes, & Stirpium Adversaria," *&c.*, and is a re-issue of Purfoot's remainder of the "Stirpium Adversaria nova" by Pena and L'Obel [*q.v.*], with a new title-page, the introduction re-set and abridged as in the 1576 issue, and the last leaf (*pp. 457–8*) re-set and abridged. The "pars altera" is paged on, and is composed of the "Rariorum aliquot Stirpium Appendix," followed by "M. De L'Obel Balsami, Opobalsami, Carpobalsami, & Xylobalsami cum suo cortice explanationes & collectanea," and two tracts by G. Rondeletius.

II. L'Homme fossile aux environs de Chartres. — Note sur les indices matériels de la coexistence de l'Homme avec l'*Elephas meridionalis* . . . par J. Desmoyers.

III. L'Homme fossile dans le centre de la France.
1. Les silex ouvrés dans le Diluvium de Loir-et-Cher par M. de Vibraye.
2. Note sur de nouvelles preuves de l'existence de l'Homme . . . à une époque où s'y trouvaient aussi divers Animaux qui, de nos jours, n'habitent pas cette contrée par M. de Vibraye.
3. Note accompagnant le présentation des objets recueillis dans les terrains de transport, les Cavernes et les Brèches osseuses par M. de Vibraye.
4. Nouvelles observations relatives à l'existence de l'Homme dans le centre de la France . . . par E. Lartet et H. Christy.

IV. L'Homme fossile dans le Périgord. — Sur des figures d'Animaux gravées, ou sculptées et autres produits d'art et d'industrie rapportables aux temps primordiaux de la période Humaine, par E. Lartet et H. Christy.

V. L'Homme fossile dans l'Aveyron. Sur une Caverne de l'âge de la Pierre, située près de Saint-Jean-d'Alcos (Aveyron) par P. Cazalis de Fondouce.

VI. L'Homme fossile à Bruniquel (Tarn-et-Garonne).
1. Note . . . par E. Trutat.
2. Note sur deux fragments de mâchoires Humaines . . . par F. Garrigou, L. Martin et L. Trutat.
3. Remarques sur quelques résultats des fouilles faites récemment par M. de Lastic . . . par H. M. Edwards et E. Lartet.

VII. L'Homme fossile dans la Haute-Garonne.
1. Sur une ancienne station Humaine . . . par É. Lartet.
2. Nouvelles recherches sur la coexistence de l'Homme et des grands Mammifères fossiles . . . par E. Lartet.

VIII. L'Homme fossile dans l'Ariège.
1. Sur deux Cavernes à ossements découvertes dans la montagne du Kaer à Massat (Ariège). par A. Fontan.
2. L'âge de Pierre dans les cavernes de la vallée de Tarascon (Ariège) par F. Garrigou et H. Filhol.

IX. L'Homme fossile dans les Hautes-Pyrénées.
1. De l'existence de l'Homme pendant la période Quaternaire dans la Grotte de Lourdes . . . par A. M. Edwards.
2. Contemporanéité de l'Homme et de l'*Ursus spelæus* etablié par les ossements cassés des Cavernes. Note par F. Garrigou et H. Filhol.

X. L'Homme fossile dans le bas Languedoc.
1. Silex taillés dans les Cavernes de Gauges par M. Boutin.
2. Remarques sur l'ancienneté de l'Homme tirées de l'observation des Cavernes à ossements . . . par P. Gervais.

United with the "Revue Zoologique," and continued as the "Revue et Magasin de Zoologie" [*q.v.*].
Three sets of this serial are in the Museum. One, from the Alex. Fry Library, in the Insect Room ; a second in the Zoological Department Library ; and a third in the Tweeddale Library.
In the Fry set the contents of each annual volume are arranged in systematic order. This is also the case in the last volume of the Zoological Library set.
In the Tweeddale set, and in the Zoological Library set (except the last volume), the contents of the whole of each series have been arranged systematically.
The title-pages in the Zoological Library set are bound at the end of each series with the prefaces and indexes, whilst the dated wrappers of the several livraisons of the second series are inserted apparently without method in its volumes.
In the Tweeddale set there are title-pages to each "Classe" in the first series that were supplied by the publisher of the second series, whilst to the second series the sectional titles only have been preserved, and bound in front of their respective volumes.

Martyn (J.) Memoir of J. Martyn . . . by . . . T. Martyn . . . with additions by G. C. Gorham. *See* Gorham (G. C.) Memoirs, *&c.* 8°. 1830.
This memoir was originally prefixed to the posthumous work of J. Martyn, entitled:—"Dissertations . . . upon the Æneids of Virgil," *&c.*, 1770.
Some of the correspondence quoted in this work forms one of the Banksian MSS. [No. 103].

MARTYN (Thomas) *Draughtsman* [*fl.* 1760–1816] The Universal Conchologist, exhibiting the figure of every known Shell, . . . drawn . . . and painted . . . with a new systematic arrangement. [Second edition.]—Le Conchologiste universel, *&c.* 4 Vol. fol. *London*, 1784 [–92].
There is a second title to Vol. i, which reads: "Figures of non descript shells, collected in the different voyages to the South Seas since 1764, *&c.* — Les figures des Coquilles jusqu'à présent inconnues," *&c.*
This copy belongs to the so-called second edition, and has, besides the engraved title-pages and dedication, 39 pages of letterpress ("Introduction" and "Preface") in English and French on opposite pages, followed by a small sheet of "Observations on the Explanatory Table," and in each volume the sheet of "Explanatory Table."
There are in all 161 hand-coloured plates of shells and two engraved plates of medals, bearing date 1788 and 1792. The frontispiece, depicting *Turritella terebra*, Lam., is not numbered, but bears the legend "ΑΦΡΟΔΙΤΗ.".
A duplicate copy of the "Preface" has been bound in front of the second volume, and duplicate copies of the first title-page in front of Vol. ii–iv.
The original issue of the work appears to have been:—Vol. i & ii, *pls. i–lxxx*, 1784; Vol. iii, *pls. lxxxi–cxx*, 1786; Vol. iv, *pls. cxxi–clx (and frontispiece?)*, 1787.
The first eighty plates were subsequently re-drawn for the so called second edition.
For detailed accounts of this work and its history by W. H. Dall, *See* Proc. U. S. Nat. Museum, Vol. xxix, *pp. 415–432*, and Vol. xxxiii, *pp. 185–192.*

—— [88 sheets of original water-colour drawings and coloured proof-plates of Shells, made for the "Universal Conchologist." 4°. 1780 ?–87 ?]
These are probably in part original, in part trial or rejected drawings. Twenty-six of these are not represented in the Museum copy of the work, although eleven are similar, while nine appeared in an imperfect, or made-up copy, seen in 1903.

Martyn (Thomas) *Draughtsman.* Le Conchyliologiste Universel, ou figures des Coquilles jusqu'à présent inconnues recueillies en divers voyages à la Mer du Sud depuis l'année 1764. *See* Chenu (J. C.) Bibliothèque Conchyliologique. Sér. I, tom. II. 8°. 1845.

This consists of a reprint of the French text of the "Introduction" to the first edition, of the "Preface" to the second, and of the explanatory tables, with reproductions of the figures on 56 plates.

Martyn (Thomas) *Draughtsman.* The English Entomologist, exhibiting all the Coleopterous Insects found in England . . . arranged and named according to the Linnean system. *pp. 33* [4]*: 42 hand-col. pls., 2 engr. pls. of medals, engr. title.* 4°. *London*, 1792.

Martyn (Thomas) *Draughtsman.* Entomologist [*sic*] Anglois, ouvrage où l'on a rassemblé tous les Insectes Coléoptères qui se trouvent en Angleterre, *&c. pp.* [*iv,*] *41* [4]*: 42 hand-col. pls., and 2 engr. pls. of medals, engr. title.* 4°. *London*, 1792.

The preface to this French version terminates with an announcement, which is wanting from the English version, that the author had in preparation a work on Birds, to be published in 1793, on the same lines as the "Universal Conchologist." One of the two copies in the Zoological Department bears Martyn's autograph.

Martyn (Thomas) *Draughtsman.* Aranei, or a natural history of Spiders, including the principal parts of the . . . work on English Spiders by E. Albin, as also the whole of the . . . publication on Swedish Spiders by C. Clerk. 2 Pt. *illust. col.* fol. *London*, 1793.

The engraved title-page to the second part reads :—'Figures of English Spiders, a work originally given by E. Albin. Revised and designed anew by T. Martyn,' *&c.*

The work contains 28 hand-coloured plates, a coloured engraved frontispiece, and two engraved plates of medals. These last are identical with those in other works by the same author.

Martyn (Thomas) *Draughtsman.* Psyche. Figures of non descript Lepidopterous Insects, or rare Moths and Butterflies from different parts of the world.—Figures des Insectes Lépidoptères, *&c.* No. 1. *pp. 6, 6 : 2 pls. col.* 4°. *London*, 1797.

The descriptions are in English and French on alternate leaves.

An autograph letter from the author to the Trustees of the British Museum, undertaking to present the work, accompanies this copy.

Only a few examples are known to exist, and the greatest number of plates in any one is 32.

A copy in the Smithsonian Institution, Washington, U.S.A., has eight pages of text.

Der Rupsen Begin, Voedzel en wonderbaare Verandering . . . door M. S. Merian. 2 Thl. 4°. *Amsterdam* [1685 ?].

An abridged translation of the German text.
This copy wants the plates, and its parts have been bound in front of the respec ive portions of the original German edition.
From the fact that the author had resumed her maiden name it would appear that this translation was issued after her second separation from her husband, circa 1685.
For critical notes on the species of Insects depicted, *Cf.* C. F. Freyer "Isis," 1842, coll. 18–49.

4°. *Amstelœdami* [1718 ?].

A Latin translation of the Dutch text to the three parts of "Der Raupsen Begin," *&c.* The plates are uncoloured, those of the third part being redrawn and reversed. The three engraved titles of the original are not reproduced.

Merian afterwards **Graff** (Maria S.) M. S. Gräffin . . . Neues Blumenbuch allen kunstverständigen Liebhabern zu Lust, Nutz und Dienst mit Fleiss verfertiget. 3 Pt. [in 1 Vol.] [*pp. iv :*] *33 pls. col., 3 engr. titles, col.*
4°. *Nürnberg*, 1680.

The title-pages to Pt. 2 & 3 read "Florum fasciculus alter (— tertius)," *&c.* This copy was probably coloured by the authoress herself.

Merian afterwards **Graff** (Maria S.) [Metamorphosis Insectorum Surinamensium, in qua Erucæ ac Vermes Surinamenses . . . ad vivum delineantur et describuntur, singulis eorum in Plantas, Flores et Fructus collocatis, in quibus reperta sunt ; tunc etiam generatio Ranarum, Bufonum rariorum, Lacertarum, Serpentium, Araneorum et Formicarum exhibetur ; omnia in America ad vivum . . . picta atque descripta per M. S. Merian [with notes on the Plants by C. Commelin.]
fol. *Amstelodami*, 1705.]

Wanting. This edition had only 60 plates.

[—— Another edition entitled :] [M. S. Merian Dissertatio de generatione et metamorphosibus Insectorum Surinamensium, *&c.* fol. *Amstelodami*, 1719.]

Wanting.
To this edition 12 plates were added by the author's daughters from materials left at her death.
Some copies contain the Dutch text in addition to the Latin.

[—— Another edition.] Dissertatio, &c.—Dissertation sur la génération et les transformations des Insects de Surinam, *&c.* *pp.* [*viii,*] *72 : 72 pls. col.*
fol. *La Haye*, 1726.

Latin and French in parallel columns.
The French translation was made by J. Rousset de Missy.
In this copy the Latin title-page and two following folios have been supplied from a copy of the 1719 edition.
The plates bear the engravers' names, and are not reversed as in the copy of the Dutch edition of 1719 in this Museum [*q.v.* infra].
The author's preface has been altered, and she is made to say that the work consists of seventy-two plates.

Merian afterwards **Graff** (Maria S.) [Metamorphosis Insectorum Surinamensium, of te verandering der Surinaamsche Insecten, *&c.* [With notes on the Plants by C. Commelin.] fol. *Amsterdam*, 1705.]

Wanting. This edition had only 60 plates.
It was issued simultaneously with the Latin edition.

——[Another edition entitled :] M. S. Meriaen over de voortteeling en wonderbaerlyke veranderingen der Surinaemsche Insecten, *&c.* *pp.* [*vi,*] *72 : 72 pls. col., engr. title.* fol. *Amsterdam*, 1719.

To this edition 12 plates were added by the author's daughters from materials left at her death.
Some copies contain the contemporary Latin text in addition.
In this copy the plates are reversed, including the lettering on two of them, as compared with those of the 1705 and 1719 editions in the Printed Book Department, and no name of the engraver is given on them.

—— [Another edition.] *pp.* [*vi,*] *51 : 72 pls., engr. title.* fol. *Amsterdam*, 1730.

In this edition the plates are the same as those of the 1726, Latin and French, edition.

Merian afterwards **Graff** (Maria S.) [Histoire des Insectes de l'Europe, dessinés . . . et expliqués par M. S. Merian . . . Traduite du Hollandais en Français par J. fol. *Amsterdam*, 1730.

Plates i–cli, with the descriptions of them (printed the full width of the page) are reproduced from the "Der Raupsen Begin," the translations of Marret's supplemental notes being given in double column.
The remaining plates are from Merian's "Neues Blumenbuch" (1680) : these have been retouched, and in some cases have additional figures of insects engraved on them.

Merian afterwards **Graff** (Maria S.) Recueil de Plantes des Indes. *foll. 3 : 72 pls., engr. title.*
fol. *Paris*, 1768.

A re-issue of the engraved title-page and plates of the "Metamorphosis Insectorum Surinamensium" as redrawn for the 1726 and 1730 editions. On the engraved title-page the new title cited above has been added, and the French names of the Plants appear on the plates, while three sheets of copper-plate explanations, entitled "Explication des noms et couleurs des Plantes de Surinam," take the place of text.

MONDE DES PLANTES. Le Monde des Plantes. Revue . . . de Botanique. Organe de l'Académie Internationale de Géographie Botanique. Dirigée par . . . H. Léveillé. Tom. I–VII. *illust.* 8°. *Le Mans*, (1891–) 1892–98.
In No. 2 the formation of the *Académie* (afterwards *Académie Internationale*) *de Géographie Botanique* is announced ; the control of the journal was afterwards (No. 8→) handed over to that Society.
The pagination of the first two parts of Vol. VII is continuous with that of Vol. VI, after which it begins afresh at 33 and runs to the end of the volume.
The Association Française de Botanique published its early Bulletins in Vol. VII, but the subsequent parts appeared independently.
[*Continued as :*]
Bulletin de l'Académie Internationale de Géographie Botanique. (Ancien Monde des Plantes.) Tom. VIII→ *illust.* 8°. *Le Mans* (*& Paris*), 1898→
The old title is retained on the first two parts, and as the running heading through the next to page 86.
In 1899 Léveillé started a new journal, also entitled " Le Monde des Plantes" [*q.v.*].

Part I, on the Trees and Shrubs, was never issued.
Part III wants the dedication, "Authoris Vita," "Præfatio," "Botanologiæ summarium," and "Errata."

—— Partis II, sectio VI (–VII). *pp. 128, with portr. of author.* fol. [*Oxford,*]
These pages are the unpublished, cancelled portion of the continuation of Part II. The text includes annotations by T. Hyde on the oriental names of the Plants. Bobart extended the text and made it the beginning of Part III, but omitted the oriental names.
This copy, formerly in Sir Hans Sloane's Library, contains pencil notes by Bobart.

—— [Another edition.] 3 Tom. *illust.* fol. *Oxonii*, 1715.
A re-issue of the same setting as the preceding, but with new title-pages. The "Plantarum Umbelliferarum," also in the original setting, is here substituted for, and issued as, the missing Part I.

—— [Another edition.] 2 Vol. *illust.* fol. *Oxonii*, 1738.
Another re-issue of the original setting, with new title-pages, on which the two parts are styled Tom. I, II.

The work, which is largely based on the "Natuurlyke Historie" of M. Houttuyn [*q.v.*], is subdivided into :—

Thl. I (1773) Von den säugenden Thieren ; II (1773) Von den Vögeln ; III (1774) Von den Amphibien ; IV (1774) Von den Fischen ; V, pt. 1 (1774), pt. 2 (1775) Von den Insecten ; VI, pt. 1 (1775) Von den Würmen, pt. 2 (1775) Von den Corallen ; Supplements und Register-Band (1776).

—— [Another edition.] 8°. *Nürnberg*, 1773–89.

Thl. I & II appear identical with the preceding, but on poorer paper ; thl. III–VI are reprints with slightly different setting. The Supplement has the title-page and *pp. xv–xvi* of the "Vorbericht" reprinted with changed date.

The above appears to be the original title of the work as first issued: the surplus, or unsold, stock seems to have been acquired by a London bookseller, who issued it with a new title reading "Arcula Gemmea: or a Cabinet of Jewels. Discovering the Nature, Vertue, and Value of Pretious Stones, with infallible rules to escape the deceit of all such as are adulterate and counterfeit," *&c. London*, 1653. The remainder then passed into other hands, and was issued with another title-page: "Gemmarius Fidelius, or the Faithful Lapidary, experimentally describing the richest treasures of Nature in an historical narration of the several Natures, Vertues and Qualities of all Pretious Stones. With an accurate discovery of such as are adulterate and counterfeit. By T. N. of J. C. in Cambridge." *London*, 1659. A copy of this last title-page was pasted over the original one in the example in this Museum.

The text seems to have been issued, *pp. 1–432* in 1845, *pp. 433–576* in 1846, and *pp. 577–605* in 1847. (*Cf.* C. D. Sherborn : "Journ. of Conch." Vol. XI, 1905, p. 169.) Some of the plates were also intended to illustrate the contemporaneous "Paléontologie universelle" [*q.v.* infra] as well as the projected "Paléontologie étrangère," and are thus superscribed.

A re-issue of the text to the preceding, with a new title-page.

Orbigny (Alcide D. d') [Paléontologie universelle des Coquilles et des Mollusques.] *pp. 392 : 55 pls.* 8°. [*Paris*, 1845–47.]

Without title-page : a wrapper from the Supplement to Tom. I of the "Paléontologie Française : Terrains Crétacés" has been substituted for it. The work, as projected, was to consist of eight volumes, with 1,500 plates, and to proceed *pari passu* with the author's "Paléontologie Française," the plates for which were to be utilized for the present work ; with a projected "Paléontologie des Coquilles et des Mollusques étrangères à la France," for which no text seems to have been prepared ; and with the "Mollusques vivants et fossiles," of which only Tom. I was issued [*q. v.* supra].

Plates were consequently prepared to serve for more than one of these works, and some of them bear superscription and numeration in accordance with this scheme.

This copy of the "Paléontologie universelle" is believed to be a perfect example of all that appeared. The text seems to have been issued, *pp. 1–208* in 1845, *pp. 209–368* in 1846, and *pp. 369–392* in 1847. (*Cf.* C. D. Sherborn ; "Journ. of Conch." Vol. XI, 1905, p. 169.)

The numeration on the accompanying plates is very irregular, as shown by the following table, in which is included a series (indicated by italics) that was intended for the present work, but only issued in the "Paléontologie Française : Terrains Crétacés," Tom. I, suppt. Occurrences in any of the works that are not indicated on the plates themselves are supplied between [ ]. The plates marked "T. Jurassiques" did not appear elsewhere, though apparently intended for the "Paléontologie Française."

ORNITHOLOGY. [Scrap-book entitled :] Beschreibungen über die noch fehlende Illuminirte Vögel Deutschlands. 2 Vol. fol. [ ]

Two (out of three) volumes, made up of 332 coloured engraved plates of Birds, with text, mostly in German MS., and Index, placed at the beginning of the third volume. The first volume is wanting ; the plates in the other two include :—

1°. 110 col. engr. plates, signed "Martinet," "Alexandre Martinet," "Martinet fils, rue du coq No. 15." Some of these plates have details engraved on them concerning the specimen represented : a few are dated, the extreme dates being 1773–92.

2°. Plates from Frisch's "Vorstellung der Vögel Teutschlands."

3°. Plates and a portion of the text of the "Naturgeschichte der Afrikanischen Vögeln" of Levaillant, translated from the French edition by Bechstein.

4°. The plates and text to the "Oiseaux Mouches" and "Promerops" of Audebert and Vieillot's "Histoire naturelle et générale des Colibris."

An old binding of Wolf and Meyer's "Naturgeschichte der Vögel Deutschlands" (1805) has been used for one of the volumes, and wrappers from the "Teutsche Ornithologie" have been utilized for title-pages.

Suppt. 2 was originally entitled "Supplement (No. II) to the Monograph on the *Iguanodon*," and was paged in continuation of Suppt. 3, the two being issued together as "Monograph of the Fossil Reptilia of the Cretaceous and Purbeck strata" in 1860. The following year Suppt. 2 was re-issued with changed heading, and fresh title-pages were issued for the two.
When first issued in 1864, Suppt. 4 was erroneously styled "No. II."
